On-Stage Setup

We are using on-stage mixer (X32) with 22 XLR outputs for the house sound board. Below is the picture of the output equipment. The outputs 1 through 22 are labeled on a top adapter board.

Please note, we are using electronic drums, specifically the controller for drums is Pearl Mimic Pro providing the following outputs (already pre-mixed): kick, snare, high-hat, ride, toms (left/right), overhead (OH – left/right), room (RM – left/right).

Lead guitar outputs are two XLR (left and right) coming out of Kemper profiler.

We are using in-ear monitors on stage.
